

Internship in Product Engineering

Location: Kato Scholari, Thessaloniki, Greece

**Your steppingstone to a great career!
Join our successful global team!**

BETA CAE Systems is a rapidly growing software and services company, with a 30-year history in the domain of engineering simulation. With a global presence, we are pioneers and innovators in computer aided engineering. Pursuing our vision, we are continuously seeking for motivated, talented, dynamic, energetic, bright, and hard-working students and recent graduates to join our internship scheme in Product Engineering Teams!

Get ready to take the opportunity to work closely with our teams, learn and evolve!
We are looking forward to receiving your application.

The timeframe

- Internship Start Date: March/April 2026

The internship in Product Engineering Department

During your internship, you will:

- be a member of an international team
- get training and experience in our software products suite
- get training and experience in Python programming language and BETA API
- gain deeper knowledge in FEA and CFD solvers
- participate in short-term computational engineering and simulation projects, applying our company's products
- assist in writing technical documentation
- validate and verify our software products
- explore computational engineering applications
- automate or customize engineering processes within our software products
- receive peer reviews
- interact and share opinions with experienced professionals

The duration of the specific internship is **6 consecutive months**, a period required for anyone to have proper training on our software, to have time to absorb the knowledge gained, to take part in projects to apply that knowledge, and experience our BETA-team family life.

The applicants

Undergraduate and Postgraduate students in relevant fields (Mechanical Engineering, Civil Engineering, Aeronautics/Aerospace Engineering, Marine Engineering, etc.), towards the end of their studies (i.e. recommended to have completed at least the 6th semester), or graduates that have recently completed their degree (within the last 6 months at most).

Good knowledge of speaking, reading, and writing in English is required.
Fulfilled military obligations for male applicants is not a prerequisite.

Sponsorship

- The 6-months internships are paid.
- Transportation by company bus to/from the company's premises is provided.
- Free breakfast, lunch, coffee and snacks
- Gym in company's premises
- Free parking area

We would gladly receive your application at [Cadence Careers](#).
